Lilacs Can Grow Here But Must Have Ample Water

Can you tell by the enclosed specimen what is wrong with my white lilac? It is seven years old and bloomed for the first time last year—now it is slowly dying.

The University plant pathologists, on examination, state that from the leaf specimens the lilac tree might be suffering from an alkali condition, or a lack of water. The marginal burning and drying of the leaves is indicative of this type of trouble.

It is suggested you basin the

tree well and soak it quite frequently. It is not unusual for some flowering shrubs to fail to flower in the spring when they have not been well watered during the previous summer.

Latest method under test for protecting plants from insects employs chemicals fed to the roots which make the whole plant toxic to insects for a short period, long enough to kill pests.

PLAIN PRICING UNIFORM TO ALL

REGARDLESS of your financial circumstances, you will pay us neither more nor less than anyone else for the same funeral service and appointments. This is a part of the high code of ethics to which we, as members of NATIONAL SELECTED MORTICIANS, subscribe. In addition, you will find complete facilities, the highest professional skill and prompt, understanding service—day or night.
